

INHERITED FROM Helix Constitution

This module is a submodule of a consuming project that includes the Helix Constitution submodule at the parent's `constitution/` path. All rules in `constitution/CLAUDE.md` and the `constitution/Constitution.md` it references (universal anti-bluff covenant Â§11.4, no-guessing mandate Â§11.4.6, credentials-handling mandate Â§11.4.10, host-session safety Â§12, data safety Â§9, mutation- paired gates Â§1.1) apply unconditionally to every change landed here. The module-specific rules below extend them â€” they never weaken any universal clause.

When this file disagrees with the constitution submodule, the constitution wins. Locate the constitution submodule from any arbitrary nested depth using its `find_constitution.sh` helper.
